

Fieldforce Automation for Retail

TakeTask is an intuitive and comprehensive mobile application for brick&mortar retailers with dispersed labour force, especially convenience and fashion. Our software enables smooth internal communication, provides tasks according to their priority and any information needed for effective work performance. It also enables reliable and quick feedback.

Brand Standards

Marketing & Merchandising

Replenishment

Challenges in Your Industry:

- Many visual merchandising activities
- Too late and imprecise reporting of incidents (eg failures)
- Low level of knowledge sharing, employee innovation and communication
- Long time of switching the production line and training for new products
- No access to all instructions (machines manuals and safety procedures)
- Time-consuming and lack of photo documentation, using paper forms
- Problems with maintaining quality with employee fluctuation
- Lower level of understanding of procedures resulting from language barriers (employees from other countries)
- Increased work environment complications for employees (many sources of information)
- Imprecise loss monitoring (eg defective products, thefts)

Multiple functions

Drag & Drop creator

Offline Access

GPS localization

Drag & drop creator

Image recognition

Signature capture

Invoicing

IOT ready

25 types of tasks

Scanning of EAN and QR codes

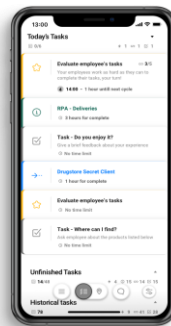

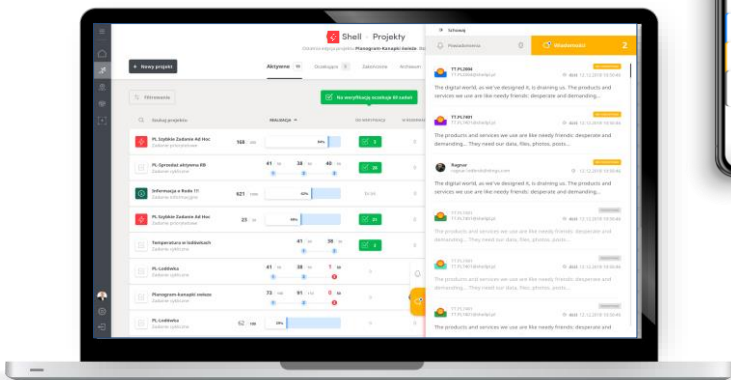

Notifications

Safety Audit

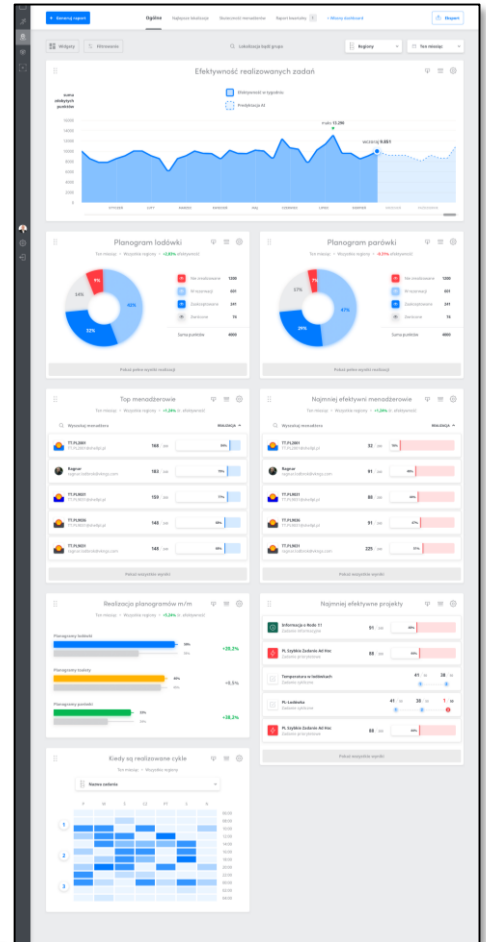

Incidents Management

Loss Prevention

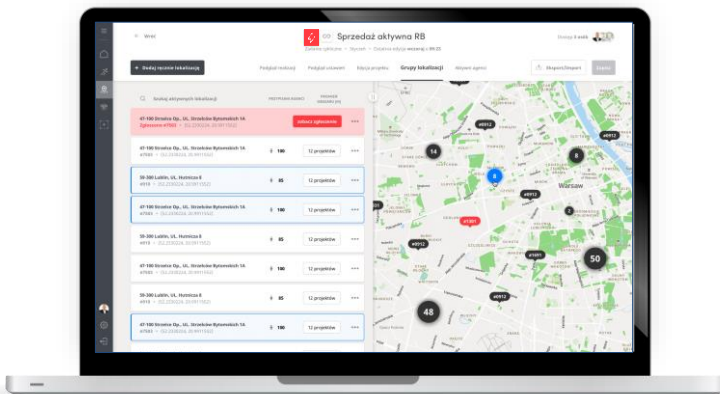

Intuitive Interfaces

Clear analytics

Logistics under control

Use it for:

Safety & fire protection

Electric Inspections

Machines maintenance

HVAC

Cleanliness

Food Safety

Energy & resources consumption

Quality Assurance

✔ Digitalization of processes

- Store Operations
- Replenishment
- Promotion
- Merchandising
- Maintenance and reporting of quality procedures
- Premises, fire, health protection and safety procedures
- Registration of receptions to and releases from the warehouse
- Posting recurring and ad-hoc tasks
- Customer Experience Assessment

✔ Integrations

- Regular manual collection of data from analog devices for analytical systems
- Displaying data from connected sensors and devices as well as systems (eg POS)
- Automatic generation of tasks based on data from IOT sensors (eg thermometers, beacons)
- Automatic generation of tasks from analytical systems (eg predictive maintenance, ERP)
- Integration with HR systems (holidays applications, training, cost settlement)

✔ Support for communication and distribution of information

- Communication at various levels of the organization
- Micro-training and access to instructions
- Dynamic exchange of knowledge and experience between employees
- Motivation supported by elements of gamification
- Collection and evaluation of employee innovations
- Employees Onboarding
- Multilingual communication

✔ Benefits of using TakeTask in production:

- Loss prevention
- Failure prevention
- Increased work comfort
- Increased work efficiency
- Improving the quality of products and service
- Increase safety
